RELIABILITY IN SUPPLY

GLOBAL SupplyLine

Welcome to Global Supply Line

Global Supply Line (GSL) is the largest valve stockist in the southern hemisphere, stocking and distributing valves as well as pipeline and oilfield products and specialises in the fast track project supply of premium brands. We have been supplying major projects throughout Australasia for over 25 years.

Our customer base consists of end-users, EPC Managers, dealers, merchants and contractors worldwide in the Chemical, Oil & Gas, Petrochemical, Process and Mining industries.

Global Supply Line offers purchasing power, reliable partners and an advanced distribution system for guaranteed availability.

We represent numerous major manufacturers, supplying high and low pressure fully certified valves including ball, check, control, diaphragm, gate, globe, needle and plug valves as well as actuators, strainers, flanges and fittings.

All sales are backed by our \$20 million public liability and professional indemnity insurance and \$20 million product liability insurance.

Our in-house engineering, test and automation facility ensures that you have access to technical backup and experience in valve engineering and sales.

Commitment to our customers

Experience, efficiency and commitment cannot be corporatised. Our sales team has over 125 years of valve and piping experience. We have the ability, experience and dedication required in this industry and pride ourselves on having the best staff in the business.

Quality Guarantee

We operate an accredited ISO 9001:2008 quality system and can provide full certification to EN 10204.3.1 (DIN 50049.3.1) on all certifiable products.

“SUPPLYING HARD TO FIND VALVES WORLDWIDE”

MAJOR MANUFACTURERS

SFEROVA

Sferova's production capability includes forged API 6D Ball valves in sizes 15NB through 1000NB (1/2" to 40") in pressure classes ANSI 150-2500lb. Valve designs manufactured include Floating ball, Trunnion mounted, Side entry, Top entry, Bolted and Welded body construction in soft and metal seated, subsea, cryogenic and high temperature applications. Sferova are involved in Oil and Gas projects worldwide and have numerous end user and product approvals. GSL has the most extensive stocks of Sferova API 6D ball valves in the world.

JC VALVES

JC Valves manufacture forged and cast Floating & Trunnion Ball Valves as well as Gate, Globe & Check Valves and Strainers up to 1250NB (50") in classes up to ANSI 2500/API 10,000. The JC Group of companies also own Actreg S.A who manufacture scotch yoke actuators up to 250,000 Nm. JC are approved by numerous majors including Shell, BP, Mobil, Exxon certified to API 600, API 6D, API 6A, CE, PED, SIL3, API 607, API 6FA and Fugitive emission. JC can manufacture valves for special and critical service including high temperature, cryogenic, abrasive service and buried service. Global Supply Line stocks an extensive range of JC valves in pressure classes ANSI 150-2500lb.

APV AUSTRALIAN PIPELINE VALVE®

Australian Pipeline Valve (APV) manufacture Ball, Gate, Globe, Check and Plug valves in pressure classes ANSI 150-2500lb as well as API6A Gate valves, Chokes and Wellheads. The Australian Pipeline Valve family of brands also broadens APV's portfolio of products and includes the following brands within the APV stable:

- **Supercheck** - Wafer Check valves.
- **Steamco** - Parallel Slide and SDNR valves.
- **Flowturn** - Cast Iron valves and Multiway Ball valves, Needle valves and Strainers.
- **Superseal** - Butterfly valves.
- **Torqturn** - Actuators.
- **Diamond Gear** - Gearboxes.

STAR LINE®

Starline Italy manufacture ball valves from 6NB through 350NB (1/4" to 14") in pressure classes ANSI 150-2500lb. Established in 1976, Starline have developed an outstanding reputation for quality and reliability. Starline have a number of major approvals including Shell and Total who demand the highest specification requirements. The Starline range is fugitive emission prototype certified in all classes. Starline manufacture Floating Ball and Trunnion mounted in standard and special materials, soft seated and metal seated. In Australia GSL maintain one of the worlds largest and most diverse Starline stock profiles including Superstar, Splitstar, Masterstar, Ultrastar and high pressure Megastar combinations.

Additional manufacturers we also represent include:

GATE, GLOBE & CHECK VALVES

ACTUATORS

PLUG VALVES

WAFER CHECK VALVES

STEAM VALVES

ACTUATORS

MAJOR STOCKIST

Our stock programme is carefully controlled to meet the most stringent industry specifications and forms one of the largest range of its kind in the southern hemisphere.

We hold Australia's largest stocks of valves and specialty products made to ANSI, API and AS/BS specifications by ISO 9001 accredited manufacturers. We commit ourselves to quality and service and stock over 9,000 line items valued at \$50 million.

Not the same old inventory

Global Supply Line (GSL) is not just another supplier of common product. Our inventory is tailored to service the oil & gas and mining sectors as well as pipeline and process markets. Our major focus is valves, GSL hold specialty items no one else in the southern hemisphere stocks but we also keep a full range of commodity lines. As a service to our clients GSL also keep all associated flanges, fittings, studs, gaskets and strainers to provide a 'one stop shop' for fast track emergency solutions.

Stock range

VALVES – Ball, Check, Duo check, Gate, Globe, Needle, Parallel Slide, Plug and Stop Check. Stocking iron, A105, LF2, LCB, WCB, WC6, C5, F11, F22, F51 and A20 in weld end, flanged ends and screwed, up to 2500 class as well as API 3000 & 5000. We also stock Ball, Butterfly and Plug Valves for high temperature and abrasive service.

FLANGES AND FITTINGS - Carbon steel. Stocking up to Schedule XXS in ANSI 150 to class 2500 as well as API 3000/5000. Heavier schedules are our specialty. We also stock Forged 3/6000lb A105 NPT and weld end fittings.

STUDS AND GASKETS – B7 Studs, Ring Gaskets and Spiral Gaskets.

SPECIALTY PRODUCTS – Strainers to 2500 class, 3 Way Valves, Orifice Valves, Insulation Joints and spare parts.

OILFIELD EQUIPMENT – API 6A Wellheads, Chokes, Swivels, Hammer Unions and Flanges.

“A SERVICE ORIENTATED COMPANY AND CLEAR MARKET LEADER”

VALVES AND ACTUATORS

VALVES AND ACTUATORS FOR ALL PROCESS FLOW APPLICATIONS

FAST TRACK SUPPLY

Global Supply Line are specialist suppliers of valves, actuators and piping products to the petrochemical, energy and general process industries carrying a comprehensive range of stock from established manufacturers.

Global Supply Line (GSL) is the emergency supply market leader in the region. For over 25 years, GSL has been extensively involved in servicing major refineries, oilfields, pipeline operators, EPC managers, mines and process industries throughout Australasia and beyond. This has given GSL a thorough understanding and a strong track record of providing seamless order fulfilment to our customers. Global Supply Line are highly specialised valve professionals. We have at your disposal our own valve experts each with a lifetime of experience in key positions. You will benefit from our long standing relationships with the leading valve manufacturers we represent.

If GSL don't have what you need in stock, we will source valves, flanges, fittings or any other pipeline products from our worldwide sources. We operate a highly developed global sourcing directory.

Emergency supply is our specialty, GSL have accounts with stockists and short lead time manufacturers from around the world. Global Supply Line will sift through it's global suppliers for you. For special and critical applications we have the solutions for aggressive media, high pressure, high temperature and cryogenics.

Like thousands of others, you'll find our prices, quality, delivery, service and back up are second to none. Merchants and end users alike all over Australia and Asia rely on Global Supply Line for fast track supply.

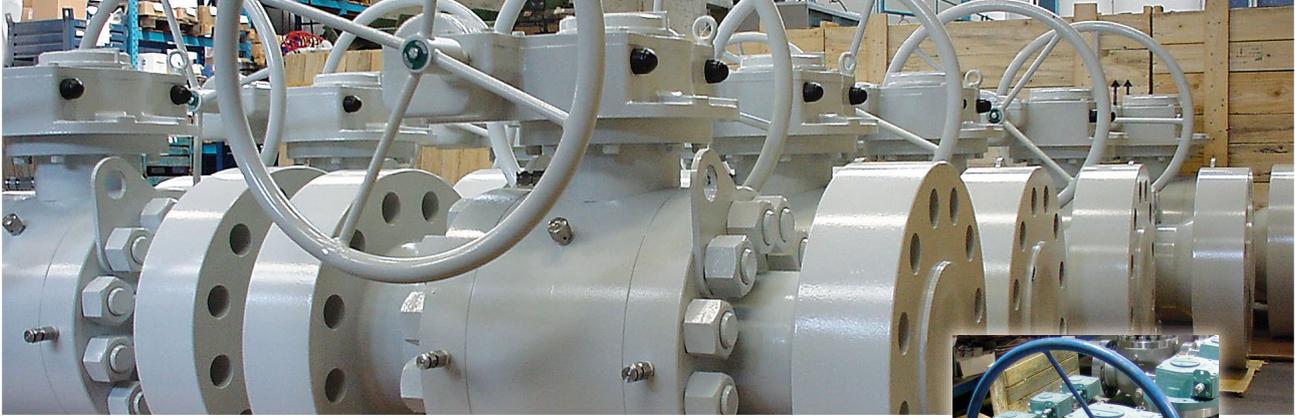

“TURNKEY SUPPLY OF VALVES AND PIPELINE COMPONENTS, SPECIALISING IN EMERGENCY SUPPLY AND SHORT LEAD TIME PROJECTS”

FLANGES AND FITTINGS

ANSI & API FLANGES AND FITTINGS

PROJECT SUPPLY

Our customers regard Global Supply Line as a dependable partner, capable of dealing with complex process valve and piping package requirements. Supplying a wide variety of products, we have a broad scope to build tailored packages to suit your needs. Our sales team are the most experienced in the industry.

Our team regularly manages production progressing, expediting and inspection, as well as having the capability to deal with your documentation requirements. We work with our clients from the early planning stages to make sure that all materials needed for a project will be available.

Technical expertise

The extensive experience and resources of the GSL team means we have strong in-house technical know how of our products and those of the manufactures we represent.

We are experts in dealing with complex issues, including consolidation of materials from multiple sources and ensuring that goods arrive on time, and in good condition at your chosen destination.

Sourcing

Our sourcing and purchasing activity covers all phases of enterprise wide procurement activities. Global Supply Line will search its worldwide manufacturer and stockist network to find the best possible suppliers thus offering our customers tailored solutions.

“GLOBAL SOURCING-GLOBAL SUPPLY”

Quality

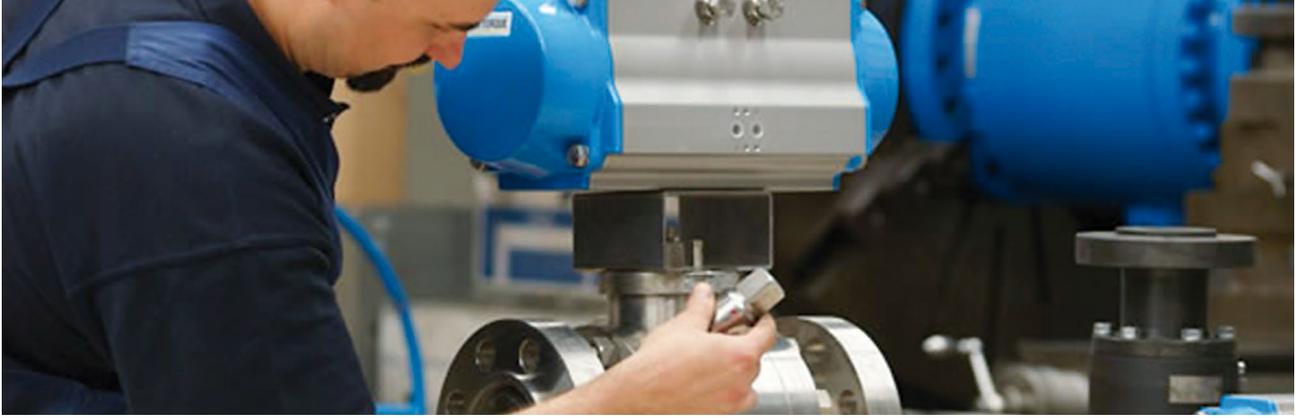

Manufacturers we represent hold relevant certifications such as ISO 9001, API 6A, API 6D, API 600, CE and PED. Quality means providing exactly what our customers require in terms of product, delivery and price. Project management, materials management and inspection reports form an essential part of ensuring our quality objectives are adhered to.

“SPECIALISING IN FAST TRACK SUPPLY OF PROJECTS FOR VALVES, PIPING COMPONENTS AND AUTOMATED VALVE PACKAGES”

OILFIELD EQUIPMENT

VALVES, CHOKES, WELLHEADS, HAMMER UNIONS & SWIVELS.

ENGINEERING & AUTOMATION

Total valve package solutions

Global Supply Line combines a comprehensive inventory of valves and actuators with a full engineering facility, as well as a test and automation shop all in one location. Operating from a modern purpose built premises gives GSL the technical and operational benefits that are derived from having all aspects of the business under one roof. Our fully equipped valve engineering, automation and test facility enables us to supply valve and actuator packages in short delivery times.

One of our key strategies has been to invest in enhanced workshop facilities enabling us to provide a more flexible and rapid response to a wide range of engineering services. This sets us aside as we can quickly satisfy specific customer requirements within our own facility under our own quality control.

Valve automation

In our well equipped valve automation facility, we assemble and test our valves with all types and brands of actuators and automation accessories in accordance with customer specifications. With more than 25 years experience in the valve business, GSL has developed a reputation in valve automation. We have invested in extensive stocks, holding a large range of rack & pinion and scotch yoke pneumatic actuators as well as brackets and accessories allowing us to assemble, test and ship in days, not months. We deliver process actuated valve packages “off the shelf”.

Testing

We also provide a comprehensive range of in-house testing services including :

- Hydrostatic and gas pressure testing (up to 15,000 PSIG).
- Valve and Actuator assembly performance and torque testing.
- In-house non destructive testing/PMI.

Engineering

Global Supply Line Engineering can perform all types of modifications and enhancements in our fully equipped facility.

We can manufacture complete flanges and valves in-house as well as performing “rush” modifications and retrofitting of standard valves, such as upgrading to extended bonnet, fitting gearboxes and special seats. In addition we offer modifications of end connections, by-passes, changing packing materials, jacketing, lining and plating. We carry extensive stocks of spare parts allowing rapid changeover of valve seats/seals together with options for modifications for specific application requirements e.g. low and high temperature seat and seal modifications.

“IN-HOUSE ENGINEERING AND VALVE AUTOMATION FACILITY ENABLES FAST TRACK MODIFICATION, ACTUATION AND TESTING”
